Aspiring Surgeons at Heritage Oak

Lumbricus Terrestris (also known as the common earthworm) was the topic of discussion this week in Heritage Oak's seventh grade Life Science classrooms. Students learned about the earthworm's internal and external structures, the functions of all its main organs and how it helps our environment. The lessons concluded with the wonderful opportunity to perform an earthworm dissection. Next in the Life Science curriculum...the beautiful bullfrog.

Heritage Oak is a traditional school appealing to parents who are seeking a proven curriculum and a safe, nurturing environment. Community awareness, academic achievement, and family values are just part of a program that focuses on the development of the whole child.

The U.S. Department of Education bestowed its highest honor upon Heritage Oak when it awarded the school the 1998-1999 Blue Ribbon award. The Blue Ribbon, our Nation's most prestigious education award, distinguishes Heritage Oak for its excellence in leadership, teaching, curriculum, student achievement, parent involvement, and community support.
